CLINICAL STAGE REPORT

Stage 2/7: Session 2

Report Date: 23/06/2026
Participant ID: 6XGFASFF

EXECUTION SUMMARY

CLIENT NAME Johnathan Miller	NDIS PARTICIPANT ID N123456789
NDIS LINE ITEM CODE 15_043_0128_1_3	DATE OF BIRTH (DOB) 2000-09-11

Active Program Objective / NDIS Goal

Johnathan aims to improve his overall emotional well-being and daily functioning by developing robust coping mechanisms for his severe anxiety and depressive symptoms, so that he can:

- Identify personal anxiety and depression triggers and implement at least 3 distinct, personalized coping strategies independently in 80% of instances over the next 6 months.
- Reduce the frequency of "freezing" episodes during daily tasks by moving from requiring constant prompting to needing only one verbal cue (or less) to resume a task during high-anxiety moments by the end of the plan period.
- Improve daily life consistency by reducing the impact of low mood on routine activities, evidenced by completing at least 3 core daily tasks independently on days when experiencing depressive symptoms within the next 6 months.
- Increase confidence in managing environmental stressors to reduce the overall intensity of anxiety as measured by a decrease in GAD-7 scores or self-reported "overwhelmed" episodes by the end of the plan period.

Clinician Session Notes & Milestones

- Identified specific environmental triggers, such as crowds and high-volume public spaces, that contribute to the participant's distress and limited independence.
- Developed practical coping strategies including Cognitive Reframing and Sensory Management to mitigate anxiety during community participation.
- Established a three-part action plan for future outings involving Visualization, Task-Orientation (Grounding), and External Focus via a physical shopping list.
- Identified moderate anxiety levels through a GAD-7 assessment, highlighting the need for cognitive-behavioral strategies to manage ruminative cycles and improve relaxation.
- Established a follow-up plan to monitor the efficacy of new techniques in reducing the intensity of anxiety during community outings.

NDIS Program Roadmap & Service Deliverables Matrix

SUPPORT STAGE / MILESTONE	SCHEDULE / DURATION	AUDITABLE DELIVERABLES	STAGE STATUS
1. Stage 1/7: Session 1 Code: 15_043_0128_1_3	2026-04-06 Qty: 1 hrs	[X] Session Conducted [X] Clinical Note Logged [X] Invoice Claim Sent	COMPLETED

2. Stage 2/7: Session 2 Code: 15_043_0128_1_3	2026-06-08 Qty: 1 hrs	[X] Session Conducted [X] Clinical Note Logged [] Invoice Claim Pending	ACTIVE (THIS REPORT)
3. Stage 3/7: Session 3 Code: 15_043_0128_1_3	2026-06-23 Qty: 1 hrs	[] Session Pending [] Clinical Note Pending [] Invoice Claim Pending	PENDING
4. Stage 4/7: Session 4 Code: 15_043_0128_1_3	2026-06-23 Qty: 1 hrs	[] Session Pending [] Clinical Note Pending [] Invoice Claim Pending	PENDING
5. Stage 5/7: Session 5 Code: 15_043_0128_1_3	2026-06-23 Qty: 1 hrs	[] Session Pending [] Clinical Note Pending [] Invoice Claim Pending	PENDING
6. Stage 6/7: Session 6 Code: 15_043_0128_1_3	2026-06-23 Qty: 1 hrs	[] Session Pending [] Clinical Note Pending [] Invoice Claim Pending	PENDING
7. Stage 7/7: Documentation & Evaluation Code: 15_043_0128_1_3	2026-06-23 Qty: 1 hrs	[] Session Pending [] Clinical Note Pending [] Invoice Claim Pending	PENDING
